Functional Assessment Process

1. Information Gathering
2. Sort and Analyze Information
3. Is there enough information?
4. Formulation of Hypothesis about Function of Behavior
5. Verify Hypothesis (Data Collection, Variable Manipulation, Etc.)
6. Verification Analysis (socially valid data, reliable data)
7. Did Data Confirm Hypothesis?
8. **Statement of Function Determined**
9. Hypothesis Intervention Options
10. Does Intervention have Potential to be Effective?
11. Behavior Plan Development
12. Implementation
13. Evaluation
14. Does Intervention Work?
15. Monitor and Change as Needed
